

# Flap Disc **XL**

**KONDOR introduce new  
 DLT Ø 115 x 22 "XL" Z40 e Z60**

**INNOVATION  
 SAFETY  
 QUALITY & PERFORMANCE  
 WASTE REDUCTION**

**INNOVATION:** production made with no 120 abrasive cloth flaps at a high Zirconia quantity and a high inclination get this disc extremely impressive .

**SAFETY:** increased fibre glass backing for a better support of the big quantity of flaps and to improve the strength and steadiness of the disc.

**QUALITY & PERFORMANCE:** the quality and quantity of abrasive cloth and its concentration on outer diameter of the disc (where working speed is under the main pressure) grant an extraordinary removal capability which lasts during the whole operation. This means long life of the disc, faster working speed and possibility of use for the most engaging applications.

**WASTE REDUCTION:** just the peripheral setting of flaps crown grants the whole consumption of the abrasive part of the disc, causing a waste reduction and a performance optimisation which comes to be really higher than traditional flaps discs.
